

X-100 Series Curing Box

Application

Multi-function curing box is an important part of UV curing system, and using with AVENTK UVLED curing equipment, it is suitable for the efficient production of glue curing, medical treatment, electronic assembly, optical assembly, semiconductor and so on. It is easy to operate and reliable, high efficiency and low cost.

Feature

1. Small size, light weight, convenient movement and desktop placement;
2. Full seal structure without UV leakage;
3. Built-in fan, overheat is controllable;
4. Irradiation height can be adjusted;
5. The product can protect the product better by increasing anti-drop device and cooling hole;
6. Increase the viewing window of the box door and visualize the working status;
7. Exterior surface is black acrylic, beautiful and generous;

Technical Data

Outline size	L*W*H:290mm*280mm*260mm
Internal size	L*W*H:230mm*230mm*150mm
Irradiation height	10--110mm(Adjustable)
Cooling method	Air cooling
Power supply(Fan)	24VDC/15W
Weight	4kg
