Go to the Apple menu and select Software Update. For more information regarding updating your system, visit http://www.apple.com/macosx.
■ Handling Precautions

Ineo products are precision instruments and must be handled with care during unpacking and installation. Drives may be damaged by rough handling, shock, or vibration. Be aware of the following precautions when unpacking your ineo external storage kit:

▶ Do not unpack the product until you are ready to install it.
▶ Do not drop or jolt the product.
▶ Do not move the external storage when it is powered up.

Hard Disk Drive Installation

1. Please connect SATA HDD to SATA connector.

2. Place SATA HDD with connector ineo case.

3. Close the Case cover and connect the USB3.1 cable.

4. The T2501 III Plus / T2501 III cPlus / C2501 III cPlus can be placed in the case.

Note:

a. Some older computers and notebooks may not provide sufficient power to T2501 III Plus / T2501 III cPlus / C2501 III cPlus.
   If you experience random disconnects, please try a different USB port and avoid using USB hubs that are not AC powered.

b. Some SATA controllers may not be able to detect T2501 III Plus / T2501 III cPlus / C2501 III cPlus because they are not Plug and Play compliant. This may be solved by installing the latest drivers specific to the SATA controllers in your computer. You may need to contact the SATA controller manufacturer for their latest drivers.

c. New HDD & SSD needs to be initialized, partitioned and formatted by the OS in order to show up as usable drive letters. For step by step instructions on how to format or partition a new drive please consult Windows or Mac user manual.
